

KIRUNA-GRINDER 350/450 SS BASIC

The Kiruna-Grinder 350 SS/450 SS is combined with both grinding stone and emery wheel. The transmission is made through a worm gear ball bearing and shafts with bearings. The grinder has double tightening shafts and a foldable water container, which also catches drops of water. Welded pipe stand.

The machine is delivered with emery wheel and the new fast grinding alu stone. Through the special mixture of grinding grits a fine grinding phase is achieved and a small row edge which is easy to hone.

With our unique accessories even persons with only a slight experience of grinding can achieve a good result.

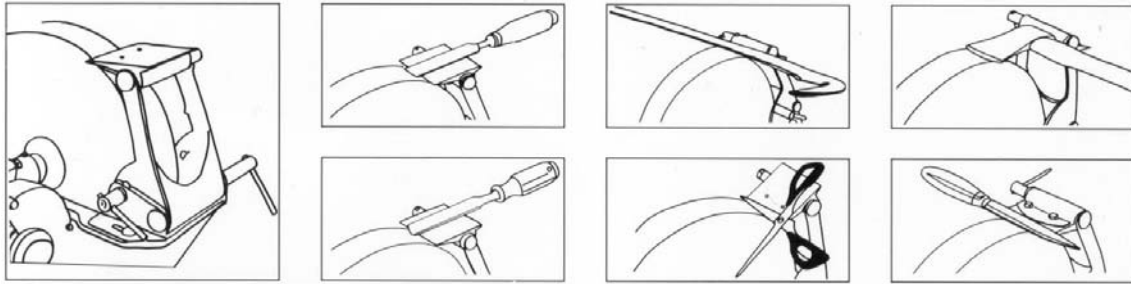

The machines are  approved.

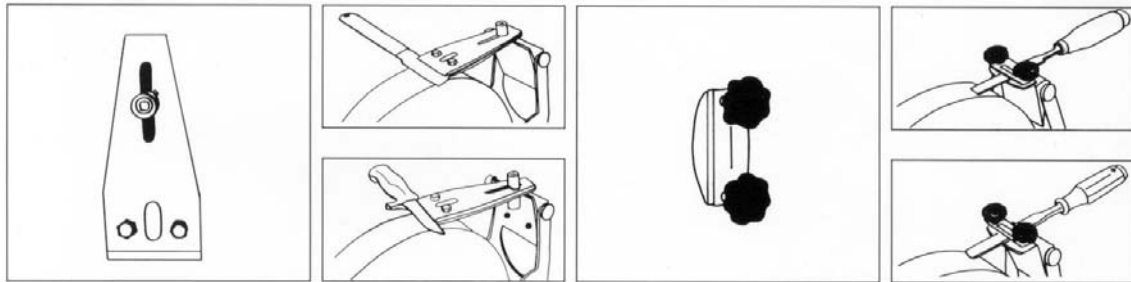

TECHNICAL DATA	350 SS Basic	450 SS BASIC
Diam. of the stone x width x hole.....mm	350 x 60 x 26	450 x 60 x 26
Diam. of the emery wheel x thickness x hole...mm	125 x 20 x 20	125 x 20 x 20
Velocity of the alu stone max.....rpm	60	60
Speed of the emery wheel max.....rpm	3000	3000
Motor outputkW	0.25 (0.33)	0.25 (0.33)
Voltage.....V	230, 1-phase	230/380, 3-phase
Rated current.....A	1.8	0.7/1.2
Net weight.....kilo	27	50

ACCESSORIES

With our unique accessories even persons with only a slight experience of grinding can achieve a good result.

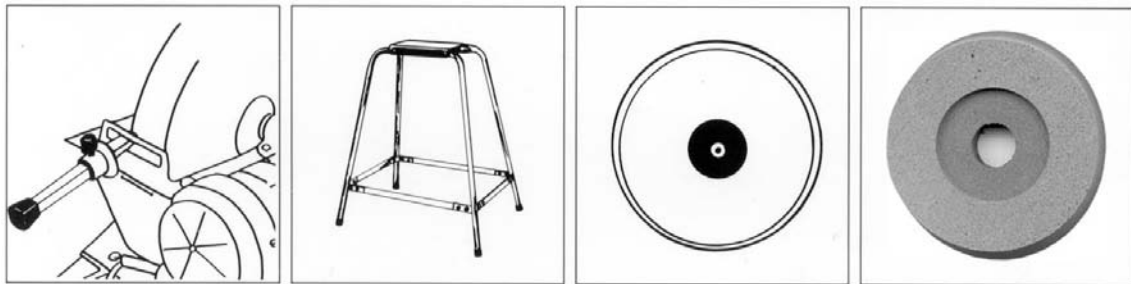

GRINDING SUPPORT gives the correct angle between the tool and the stone which facilitates the work.
